COMP1682.1 Project Proposal

[Your Project Title]

[Your Name]

BSc (Hons) Computing

[Your Banner ID]

1. Overview

Write 100 - 300 words describing as succinctly as possible the outline and rationale of your intended project using third person grammars (no 'I', no 'my').

Including:

- Context
- Problems in the above context
- Solution
- Benefits of this solution

Keywords: [comma delimited list of key words in this project]

2. Aim

Including:

- What will this project provide when finishing?

3. Related works / Literature review

Including:

Research about the relevant technologies available and previous works

- Their concepts/definition
- Similar products
- ...

4. Objectives

4.1. Objective noun

4.1.1.Outcome describing this objective in more detail

4.1.2.Activity verb clause [0.5]

4.1.3.Activity verb clause [2.0]

4.1.4.Activity verb clause [1.5]

4.2. Objective noun

4.2.1.Outcome describing this objective in more detail

4.2.2.Activity verb clause [0.5]

4.2.3.Activity verb clause [1.5]

4.3. Objective noun

4.3.1.Outcome describing this objective in more detail

4.3.2.Activity verb clause [1.5]

4.3.3.Activity verb clause [2.0]

4.4. Objective noun

4.4.1.Outcome describing this objective in more detail

4.4.2.Activity verb clause [3.0]

4.4.3.Activity verb clause [1.5]

4.4.4.Activity verb clause [2.0]

4.5. Project Framework or Any Methodology used

5. Legal, Social, Ethical and Professional

Identify and discuss any legal, social, ethical and professional issues and considerations in this proposed project. What are the applicable laws? Will this project effect societal change? Is the proposed system open to abuse? How will you address the issues in a professional manner?

All projects which include contact with people (other than university staff and students you are expected to interact with in the normal course of your degree programme) will require clearance from the Research Ethics Committee. Such contact may, for example, be interviews or questionnaires to elicit requirements or evaluation such as user acceptance testing.

Introduction:

- Your project's main aims and its benefits.

- The necessity or the importance of Legal, Ethical, Social, Professional for your project. (Short paragraph).

5.1. Legal

....

5.2. Social

...

5.3. Ethical

....

5.4. Professional

...

6. Planning (see appendix A)

You will describe 2 major contents:

- What model will you use to make a schedule (for ex, Scrum, Scaled, Crystal, Kanban.... you should look at the development process in Enterprise Web Software Development or Software Lifecycle).

- What do you plan to do for each phase of your project?

And show your schedule created on project management software (for ex, MS Project).

You should put the Gantt chart (based on your schedule) in Appendix A.

7. Initial References
